PreludeSys Alignment – DCS for Azure

As one of Delphix's trusted global partners and a Microsoft Solutions Partner with over 25 years of experience, we blend deep industry insights with technical expertise to deliver tailored solutions to our clients.

Our Diamond Sponsorship and dedicated Center of Excellence (COE) team demonstrate our commitment. We have over 150 Microsoft-certified Azure and Fabric engineers and more than 50 Delphix-certified specialists. This empowers us to accelerate data operations, fortify data security, and elevate business intelligence for our clients in Azure cloud platform.

PreludeSys Services

Consultation

We help navigate data governance, compliance, and DevOps complexities within Delphix, assess risks and design solutions to safeguard data and ensure regulatory adherence

Integration

We integrate Delphix with AI/ML workflows, providing clean data sets and seamless integration with your existing infrastructure and workflows.

License Provisioning

We recommend cost-effective configurations, select the right licensing model, plan capacity, and offer reselling options.

Implementation

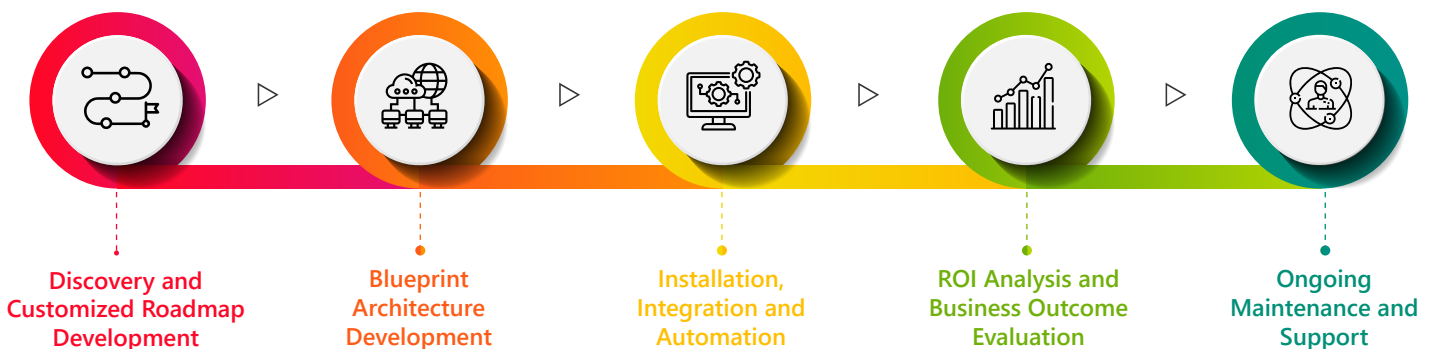

PreludeSys ensures smooth Delphix deployment, infrastructure configuration, data integration, & user training.

Support and Enablement

Our experts provide 24/7 support, troubleshooting, monitoring, and optimization to keep your Delphix environment running smoothly.

Our Phased Approach

Why PreludeSys?

- A Global Strategic Partner with 50+ Delphix certified experts.
- A Microsoft Gold Partner with 150+ certified engineers.
- A Microsoft Fabric Featured Partner at Ignite, FABCON & MS BUILD.
- Early Fabric adopter spearheading multiple project initiatives and driving customer engagement on the platform.

Why DCS Azure?

- Compliance with regulations such as PII, PCI, DSS, CCPA, HIPAA, GDPR.
- Protective of sensitive data both on-prem and cloud from data breaches and vulnerability.
- OneStop platform for data modernization, transformation, governance and compliance.
- Increased ROI and interoperability with compliant data for AI and ML training
